

Blue Bug Photography

by Sally Smart

Based on the stunning North Wales coastline of Prestatyn, I have worked hard to build an extremely exciting and successful photography business with a reputation for quality and above all else, fun!

Your Wedding Photography is one of the most important aspects of your big day and you will be spending a great deal of time with your chosen photographer, so my job (apart from capturing all of your most magical moments throughout your day) is to actually keep you calm, relaxed, happy and at ease, whilst providing a few giggles along the way.

Even after ten years of photographing weddings I am always experimenting with new techniques which keeps 'my' style of photography fun and fresh without making you over pose!

I can tailor a package to suit you and your budget and even provide a second photographer giving you a different perspective and angle creating those much loved candid images.

I have been a finalist of the Welsh National Wedding Awards many times.

My basic package is perfect for those wishing to capture the ceremony up until the wedding breakfast. I ensure that you have all your memorable couple shots and family shots before you head in for your meal.

My day package is very popular as it covers all of your wedding preparations allowing you the time to feel comfortable in front of the camera. I then go on to capture the ceremony and your day up until your wedding breakfast.

My most popular package is the full package and this captures all of your wedding preparation until after your first dance. This package will give so many more opportunities for capturing your day and evening guests too.

With all of my packages I am able to add in a second photographer to capture all of your candid images and a different perspective on your day.

I love to get to know my brides and grooms before the big day by having a pre-wedding shoot. This allows me to see what makes you smile, how comfortable you are in front of the camera, how your body language comes across and how much direction you need. It's a fabulous, fun thing to do if we can synchronise diaries.

I am also thrilled to offer Videography from the very talented and lovely James from Woodpecker Films, our joint package is through Blue Pecker (a cheeky play on our names).

Basic Package
