

# *What we do*

## *wedding firework displays*

### TAILORED DISPLAYS

Your display can be tailored in colour and style to match the theme of your wedding.

### PYROMUSICAL DISPLAY

Display choreographed to a music chosen by you to bring greater impact to the show.

### LANCEWORK

Popular for writing a message or picture for example couples initials or a champagne bottle.

### BESPOKE DISPLAYS

We can design a show to your budget and, within constraints, to your colour scheme. At Phoenix, we have many historical 'set pieces'. These are large, ground mounted displays with gold or silver sprays and Catherine wheel effects. Upon request we can supply a list of the wide variety to include in this special pack.

# *The wedding displays*

*to make your wedding special*

## CELEBRATION

£650 incl. VAT

A shorter display, but full of power and colour, ideal for a quite stunning impact. Running time is 3 minutes and power rating is 12.

## BRONZE

£895 incl. VAT

This display is the core of all the firework packages. The Bronze display will ensure that you enjoy a fireworks display that will delight both your guests and your budget! Running time is 6 minutes and power rating is 7.

## SILVER

£1,095 incl. VAT

The Silver display builds on the Bronze with added effects of greater depth, colour and animation. We are able to set off more fireworks from two positions in the Silver display, allowing greater symmetry for better viewing. Time span is 8 minutes, power rating 8.

## GOLD

£1,395 incl. VAT

The Gold display is a large, double-firing site show full of dynamic movement and style. We make use of many more special effects as well as ground based 'Catherine Wheel' style of set pieces. Unless the requirement is for a longer display, this display will still be fired to last 8 to 10 minutes, to create a faster tempo display with power rating 9.

## PYROMUSICAL

from £ 1,500 incl. VAT

Pyromusicals are a favourite for spectators because of the extra 'wow' factor that music offers. Phoenix designers propose music tracks that would be appealing and synchronise the fireworks to fire for maximum effect. The show is normally 6 to 8 minutes long packed with special effects for great impact on the audience. Power rating is 10.

\*\*\*Power rating indicates the speed of the fireworks being fired

# *Options*

*customise your display*

## REMOTE START

£30 incl. VAT

Start the show with a remote-controlled firing button - take control!

## DIAMOND LATTICE

£150 incl. VAT

Large Catherine wheel and spray - Diamond lattice; three gold sprays mounted in four positions with four Catherine wheels contained within. We have many more options, please ask for details.

## HEART INITIALS

£150 incl. VAT

Picture of a heart with the Bride and Groom's initials mounted on either side.

If it is raining, we are still able to fire the display as the fireworks are fully waterproofed. We will always work with the Bride, Groom and the venue to change the time if it looks like better weather is on way. However, the display has to be fired by 11pm, after which it is illegal to let off fireworks.
